IDENTIFIERS	*Truckee Meadows Community College NV

ABSTRACT

The Truckee Meadows Community College 2002 FactBook summarizes institutional data pertaining to enrollment trends, student profiles, institutional outcome measures, campus resources, and the external environment. The institution had a total enrollment of 10,445 students (17 percent of whom were full-time and 36 percent part-time and attending night classes only). The median age of the student population was 25. Fifty-five percent of the students were female and 19 percent were ethnic minorities. The average annual full-time equivalent enrollment (FTE) by discipline area was 36.6 percent for vocational/technical programs, 55 percent for transfer/general education, and 8.4 percent for developmental education. The college reported a campus retention rate of 74 percent and a persistence rate from fall 2001 to spring 2002 of 56 percent. With respect to campus personnel, there were 142 full-time faculty, 338 part-time faculty, and 243 staff and administrators. Forty-seven percent of the faculty were female. The 2001-02 operating budget consisted of the following revenue sources state appropriation (72.9 percent), registration fees (15.9 percent), non-residential tuition (3.1 percent), miscellaneous student fees (0.2 percent), operating capital investment (0.3 percent) and estate tax credit (7.7 percent). The report concludes with external environment data including population estimates and total employment by industry. (RC)

Enrollment Trends

This chapter of ***FactBook 2002*** provides historical data on headcount and FTE at TMCC. In most cases, the data included in this section represents state supported enrollment only. Definitions for the following terms are useful in deciphering abbreviations and enrollment related headings.

DEFINITIONS:

Census: The official reporting date to submit enrollment data to the Chancellor's Office is known as the *"census date"*. For Fall semesters it is October 15 and for Spring semesters it is March 15.

Enrollment: A measure of the number of students enrolled in courses at an institution; enrollment data is either represented by headcount or FTE.

FTE: Full-time Equivalent Enrollment (FTE) in this section applies to the statistical measure of the instructional workload generated by students taking courses. One FTE is equal to registration in fifteen credit hours, whether taken by one student or by the combination of several students. The State uses FTE as a measure of enrollment in determining the budget for the College.

Headcount: As the most basic form of student enrollment information, headcount represents an unduplicated count of students enrolled in at least one credit course.

Rollover: Also known as carryover, rollover refers to enrollments that occur after a census date. Rollover is added to the next semester's enrollment totals to produce an official headcount or FTE figure.

State Supported: Credit bearing academic courses that are degree related, developmental, or vocationally oriented are considered state supported.

UCCSN: University and Community College System of Nevada

Student Profile

Student characteristics and demographics, such as age, ethnicity, and gender, as well as enrollment status, degrees conferred, and more, can be found in this chapter of ***FactBook 2002***.

DEFINITIONS:

Enrollment Status: All students at TMCC are classified as continuing students, new transfer students, or new college students (first-time students).

End of Term Headcount: The demographic characteristics of students depicted in this section are based upon headcounts taken at the end of each semester. Also, all figures represent student enrollment in state supported courses.

Degrees Conferred: Each academic year the number of degrees and certificates earned by TMCC students are reported by discipline. Within an academic year, students may graduate in the Fall, Spring, or Summer terms.

Degree Types: In general, degrees and certificates can be broken down into two categories, transfer degrees or vocationally oriented degrees. At TMCC, the Associate of Arts, Associate of General Studies, and Associate of Science are considered transfer degrees, while the Associate of Applied Science and Certificate of Achievement are considered vocational degrees.

Graduation Rate: The final page in this section is a chart depicting the average length of time it takes for first-time full-time degree-seeking students to graduate.

Outcome Measures

Outcome measures for TMCC, such as Retention, Persistence, Graduation Rate, Capture Rate, and more, can be found in this section of ***FactBook 2002***.

DEFINITIONS:

Capture Rate: The percent of Washoe County School District graduates who attend TMCC.

 # Retained: The number of students who remain in a class until the end of the semester and receive A,B,C,D, Pass (P), Satisfactory (S), In Progress (X), or Audit (AD) grade notations. (Math 000L enrollments are excluded)

Retention Rate: The number of students retained in a course or program divided by the total number of students enrolled (a.k.a. % Retained).

Persistence: The tracking of students from one semester to the next. This measure is derived by isolating a cohort of students and then calculating the percent of the original group that returns with each advancing semester. Through this definition, students who leave for one or more semester(s) and then return to the College still contribute to the persistence rates for each semester they attend. Persistence is best measured by tracking first-time college student cohorts (standing= U01, status=NW).

Retention Rate by Semester

Fall 1994 - Spring 2002

 # RETAINED: The number of students who remain in a class until the end of the semester and receive A,B,C,D, Pass (P), Satisfactory (S), In Progress (X), or Audit (AD) grade notations.
(Math 000L enrollments are excluded)

RETENTION RATE: The number of students retained in a course or program divided by the total number of students enrolled.

Persistence Rates

Fall 1993 - Fall 2001 Cohorts

Persistence: The tracking of students from one semester to the next. This measure is derived by isolating a cohort of students and then calculating the percent of the original group that returns with each advancing semester. Through this definition, students who leave for one or more semester(s) and then return to the college still contribute to the persistence rates for each semester they attend. Persistence is best measured by tracking first-time college student cohorts.

1st-time College Student Cohorts		*After ONE Semester*		*After TWO Semesters*
